EXPERIENCE

C2 Technologies, Newport News, VA — *Developer*

AUG 2015 - AUG 2017

Developed and updated training simulations for small business and military contracts, focusing on Flash to HTML5 conversion.

District Trivia, Bethesda, MD — *Intern*

JUN 2014 - AUG 2014

Developed updated versions of interactive applications using HTML5 for use in live events at local businesses.

iD Tech Camps, Poughkeepsie, NY/Boston, MA — *Instructor/Lead Instructor*

JUL 2012 - AUG 2012, JUL 2013 - AUG 2013

Instructed iD Programming Academy students at Vassar and MIT two week overnight camps in the Xbox 360 Programming and Minecraft Modding and Java Coding courses, respectively.

PROJECTS

Deep Six Detritus — *C#/Unity*

2D space junkyard puzzle game with RPG elements, developed for PC and mobile.

Cake Raid — *C#/Unity*

2D tower defense with the theme of defending cake from eager bugs. Originally developed in part-time student group using C#/XNA and showcased at the Strong National Museum of Play; later ported to Unity.

Renu — *JavaScript/HTML5 for Windows 8*

2D platformer with shooter elements, focused around the theme of improving the world through technology.

EDUCATION

Rochester Institute of Technology – *B.S. GD&D*

DEC 2017
